

SHIVA RANGU

Java Software Developer

+91 9573570449 | rangushiva2017@gmail.com | Hyderabad, Telangana, India | [LinkedIn: linkedin.com/in/shiva-rangu](https://www.linkedin.com/in/shiva-rangu)

PROFESSIONAL SUMMARY

Results-driven Java Software Engineer with 2.8+ years of experience designing, developing, and maintaining scalable microservices-based web applications. Proficient in Java, Spring Boot, RESTful APIs, GraphQL, and AWS cloud services. Proven track record delivering high-quality, testable code with 80–85% unit test coverage, driving CI/CD automation, and collaborating in Agile cross-functional teams. Passionate about clean architecture, performance optimization, and continuous improvement.

TECHNICAL SKILLS

Languages & Frameworks

Java, Spring Boot, Angular, Hibernate

APIs & Messaging

REST API, GraphQL, Kafka

Databases

MySQL, MongoDB, AWS DynamoDB

Testing

JUnit, Mockito, Cucumber, Rest Assured, Playwright

Cloud & DevOps

AWS, Docker, Jenkins, SonarQube, GitHub

Build & Version Control

Maven, Gradle, Git

Methodologies

Microservices Architecture, Agile/Scrum, CI/CD

Other Tools

Postman, Swagger

PROFESSIONAL EXPERIENCE

Programmer Analyst – Backend Developer | Cognizant | Client: Chewy (Autoship Platform) Oct 2024 – Feb 2026

- Architected and developed microservices-based backend systems for subscription-based pet product delivery (food, medicine, toys) using Java, Spring Boot, and AWS DynamoDB, serving millions of active subscriptions.
- Designed and implemented RESTful APIs and GraphQL endpoints to support autoship order management, payment workflows, and real-time subscription updates.
- Achieved 80–85% unit test coverage by building comprehensive test suites using JUnit and Mockito, significantly improving code reliability and reducing production defects.
- Automated CI/CD pipelines using GitHub, Jenkins, and SonarQube with integrated security scanning, enabling seamless deployments across DEV, QAT, STG, and PROD environments.
- Led migration of backend services from Node.js (AS 1.0) to Java (AS 2.0), improving performance, scalability, and maintainability.
- Developed backend automation testing frameworks using Cucumber and Rest Assured, reducing manual API testing effort by streamlining regression cycles.
- Managed deployments by triggering parameterized Jenkins jobs, publishing versioned artifacts, and validating endpoints via Postman.
- Conducted thorough pull request reviews, provided constructive feedback, and upheld high code quality standards across the team.
- Collaborated closely with cross-functional teams including product managers, QA engineers, and frontend developers to deliver end-to-end features aligned with business goals and timelines.

Tech Stack: Java, Spring Boot, Microservices, REST APIs, GraphQL, AWS, DynamoDB, JUnit, Mockito, Jenkins, SonarQube, Cucumber, Rest Assured, Docker, Git

Programmer Analyst – Backend Developer | Cognizant | Client: Macy's (CCX Platform) Dec 2023 – Sep 2024

- Implemented centralized exception handling in Spring Boot microservices, improving error consistency and reducing unhandled failures across the Contact Center Experience (CCX) platform.
- Developed structured logging with correlation IDs, enabling faster debugging, reducing mean-time-to-resolution (MTTR), and cutting log noise significantly.

- Wrote and maintained unit tests using JUnit and Mockito, ensuring code reliability and stability for critical customer-facing features.
- Collaborated in Agile sprint cycles, participated in code reviews, and contributed to continuous delivery of production-grade features.

Tech Stack: Java, Spring Boot, SQL, REST APIs, Maven, Git

Software Engineer Intern | Cognizant

Jan 2023 – Jul 2023

Project: Movie Booking Application

- Built a full-stack movie booking application enabling users to register, log in, search movies, and book tickets; admin dashboard supported ticket management and seat availability tracking. Tech: Java, Spring Boot, Angular.

Project: Hotel Management System

- Developed a microservices-based Hotel Reservation System with RESTful APIs for room search, booking, reservations, and cancellations. Integrated Kafka for async messaging, Swagger for API documentation, and JUnit/Mockito for testing. Tech: Java, Spring Boot, React, Microservices, Kafka, Swagger.

EDUCATION

Bachelor of Technology (B.Tech.) – Information Technology

2020 – 2023

Anurag Group of Institutions, Hyderabad, Telangana, India | CGPA: 8.4 / 10

CERTIFICATIONS

- GitHub Foundations – GitHub (Valid through Mar 2028)
- AWS Certified Cloud Practitioner – Amazon Web Services (Valid through Apr 2029)
